- [Where We Operate](#)

Rapid and unpredictable change is the “new norm” in today’s interconnected world. Environmental stress, natural disasters, political upheavals, violent terrorist attacks, criminal networks and kidnappings highlight instability around the globe.

Osprey Global Solutions provides a proactive full-spectrum capability to address medical, logistical, and construction life-support services, humanitarian assistance, security and business intelligence in this global domain.

- [What We Do](#)

Osprey Global Solutions provides global full-spectrum Life Support Services, to include Medical, Logistics and Construction; Protective Security Services related to both individual and asset

protection, and security analysis; Training Programs, which are designed to be objective oriented to meet specific client needs where business, government and diplomacy must continue unimpeded; and Business Intelligence, where domain information, research and analysis are tightly linked to success.

- [Life Support Services](#)

Osprey Global Services provides life-support services to include medical, logistics and construction.

- [Medical](#)

- **Supporting Medical Operations and Clinical Research**

- **DISASTER RELIEF**

- Ability to establish, staff and supply temporary clinics while permanent solutions are developed

- Self-sufficient personnel reduce burden on strained resources

- Coordinate with local governments, government agencies, not-for-profit entities and for-profit companies to maximize efficiencies

- Develop relationships with local physicians and governments to provide sustained care

- Build permanent medical facilities, including urgent care clinics, and rebuild or establish infrastructure

- **ON DEMAND MEDICAL FACILITIES**

- Mission specific medical support

- Operational within one hour of delivery

- Ranges from General Medicine to Trauma Capabilities

- Mission supported

- Infrastructure rebuilding

- Medium to long-term team deployment

- Corporate compounds

- Primary to urgent care clinics in peace time or war zones

- Secure, self sufficient, designed to mitigate waste

- **CLINICAL TRIALS IN EMERGING MARKETS**

- Large patient populations with diseases of both developed and developing world reduce patient recruitment times

- Fewer competitor trials, as other organizations lack the full range of resources

- Opportunities exist to develop relationships with local physicians and medical centers

- 85% of the worlds population lives in emerging markets in critical need of support

- Patients are receptive to receiving quality care to improve health

- Cost of doing business is less in emerging markets

- **TEAM EXPERIENCE**

- 100+ years experience within senior leadership

- Contract Research Organization experience

- Pharma/Biotech experiences

- Infectious Disease, HIV, TB, Malaria

- Tactical medical experience

- Humanitarian assistance

- Disaster relief

- Non-profit support

- **BENEFITS**

- Rapid deployment by air and sea to quickly reach challenging locations

- Emergency relief experience with natural or man-made disaster

- Sustainable clinic/laboratory/housing construction

- Emerging markets have higher populations of people needing care and willing to participate in clinical trials

- [Logistics and Construction](#)

- **Logistics and Construction**

- Building Affordable, Durable Structures to Support Operations and/or Revitalize Challenging Areas.

- **Construction Management and Logistics**

- Logistics managed by a central team of experienced professionals

- Advanced Project Control System ensures cost effective project delivery

- Communications practices provide clients with real time project information

- Extensive use of lean construction practices and electronic material and equipment tracking

- **Construction Practices**

- Local labor is employed early on in the project

- Precision engineered building system requires fewer advanced construction skills

- Buy local materials when possible to support local economies and reduce transit time

- Building components are lightweight, reducing reliance on heavy equipment

- Bulletproof skin/structure available

- **Mobile Expeditionary Factory System Benefits**

- Containerized mobile factory is brought to host country for immediate operation start up when appropriate

- Wide variety of construction methods including structural panels, composites, roll formed steel, concrete and others

- Low maintenance finishes and systems reduce upkeep costs and add long-term value

- **Applications**

- Residential

- Office

- Telecommunication

- Government and military housing

- Schools and classrooms

- Hospitals and clinics

- Public utilities and infrastructure

- **Benefits**

- Logistics team handles all project scenarios from start up to hand over

- Local labor and materials create cost efficiencies

- Buildings go up rapidly for faster occupancy

- Structures are built to last in harsh climates

- Structure and systems are energy efficient

- [Protective Security](#)

- Providing Worldwide Protection and Security

- **INDIVIDUAL, FACILITY AND ASSET PROTECTION**

- Risk and Threat Analysis, and Management

- Protective Security Management of High Profile, Private, Commercial and Government Operations

- Protective Security Operations for Individuals, Organizations, Facilities and Proprietary Information Systems

- Counterterrorism and Tactical Resolutions

- Major Event Management

- Executive Travel Safety and Security

- Counterterrorism

- Protective security

- Maritime security

Counter Piracy Operations  
Personnel Recovery Worldwide  
Precious Cargo Security and Movement

- [Training](#)

If you train someone to do, or to be, something foreign to their nature, they will lack self-confidence; and self-confidence is vital to success. Effective training allows a person to be them-self.

Training programs are designed to meet specific client needs and include professionally developed lesson plans and student handbooks. OGS personnel are certified professional trainers, with years of experience training others to meet real world requirements. They possess extensive skills and expertise in virtually all fields of counter terrorism, protective security, military special operations, maritime security, police and investigative training, intelligence gathering and analysis, and leadership, management and ethics.

- [Business Intelligence](#)
